

Position Summary:

The Adjunct Construction Technology Instructor reports directly to the Dean for Career & Technical Education. This position works within Career and Technical Education Division of UA-EACC, and will provide high school & college instruction, and customized training for industry partners in Construction. This role involves delivering both classroom instruction and hands-on training to prepare students for careers in the building trades. The ideal candidate will have practical experience in carpentry and construction, strong communication skills, and a commitment to student success.

Key Responsibilities:

- Deliver engaging instruction in construction-related subjects including rough framing, roof framing, exterior and interior finishing, blueprint reading, construction math, and estimating.
- Teach students to safely and effectively use hand tools, portable power tools, and other carpentry equipment.
- Guide students in working with lumber, panel products, roofing materials, fasteners, and hardware.
- Develop lesson plans, assignments, and assessments aligned with course objectives and industry standards.
- Maintain a safe and organized classroom and workshop environment.
- Monitor student progress and provide timely feedback and support.
- Collaborate with program staff to ensure curriculum relevance and continuous improvement.
- Participate in required training, meetings, and professional development activities.
- Other duties as assigned.

Qualifications:**Required:**

- 3-5 years' experience in the construction field.
- Proficiency in blueprint reading, construction math, and estimating.
- Ability to teach hands-on skills and theoretical concepts effectively.
- Strong interpersonal and communication skills.

Preferred:

- *Associate's degree or higher in Construction Technology or a related field.*
- *Prior teaching or training experience.*
- *OSHA certification or other relevant safety credentials.*
