
Job Title: Clinical Instructor – Radiologic Technology**Position Summary:**

The Clinical Instructor for Radiologic Technology is responsible for facilitating student learning in both clinical and laboratory settings. This role supports the development of students' technical skills, clinical competence, and professional behavior by providing instruction, supervision, and evaluation in accordance with program standards.

Key Responsibilities:

- Conduct regular visits to assigned clinical sites to observe, support, and evaluate students during their clinical rotations.
- Collaborate with clinical staff and preceptors to ensure students meet learning objectives and maintain professional standards.
- Provide hands-on instruction in positioning labs, reinforcing proper radiographic positioning techniques, equipment usage, and patient care practices.
- Assess student performance through direct observation, competency evaluations, and feedback from clinical personnel.
- Offer timely, constructive feedback to students to promote skill development and critical thinking.
- Ensure students adhere to safety standards, including radiation protection and infection control protocols.
- Maintain accurate records of student progress, clinical hours, and competency achievements.
- Address student concerns or performance issues and develop improvement plans when needed.
- Participate in program meetings, curriculum development, and accreditation processes as required.
- Stay current with advancements in radiologic technology and educational best practices.

Qualifications:

- Associate's or Bachelor's degree in Radiologic Technology or related field (Bachelor's preferred).
- Current certification with the American Registry of Radiologic Technologists (ARRT).
- Current state licensure (if applicable).
- Minimum of 2–3 years of clinical experience in radiologic technology.
- Prior teaching or clinical instruction experience preferred.
- Strong communication, organizational, and interpersonal skills.

Work Environment:

- Combination of classroom/lab settings and travel to affiliated clinical sites.
- Frequent interaction with students, faculty, and healthcare professionals.
